

Building Up Your Gears (Assignment Solution_Module 2)

Problem Statement:

Make your resume and get ready with your first and most important gear for the placement process. Think about all the sections that are relevant to your stream of study and don't forget to format it well!

Sample Answer:

Below is a sample resume containing all the relevant sections that should be mentioned in an ideal resume. You can create your resume using a similar format and mention the relevant details according to your stream of study.

Sample Resume:

Ronald McDonald

Educational Details

- 2019** B.Tech Computer Science Engineering - 82.2%, Syntax University, Chandigarh
- 2015** CBSE XII - 88.7% (Physics, Chemistry, Maths, Computer Science),
Firefox Public School, Chandigarh
- 2013** CBSE X - 86%, Firefox Public School, Chandigarh

Internship(s)/Work Experience

- **September 2019- December 2019**

Front End Development Intern, Floppy & Compact Disk Technologies

- i) Integrated GraphQL APIs with ReactJS.
- ii) Designed and developed front end using ReactJS.
- iii) Collaborated with product managers, back-end developers, and web designers for rapid prototyping and testing.
- iv) Created quality mockups and prototypes for different screen resolutions.

Project(s)

- **Election Website - Jan'18- Jun'18**

This is a website that was created for organising our college elections where all the students of our college can cast their vote. A student cannot vote more than once. The number of votes is stored in an encrypted format using AES-256 Encryption in the database.

This website was built as a college project with a team of 4 people where my responsibilities included developing the front end and creating the encryption algorithm.

- **Ctrl Budget - Sep'18 - Oct'18**

This is a simple ReactJS based website that helps you track your expenses. You can add your monthly budget to get a detailed overview of your expenditure. You can also create groups with your friends and share expenses with them.

This website was built by me as a project for Internshala's Web Development Training where I developed and tested the front end using ReactJS.

Skills

Technical Skills

- **Languages**
C Language (Advanced)
C++ (Intermediate)
HTML, CSS (Advanced)
JavaScript (Advanced)
- **Frameworks**
ReactJS
Ruby on Rails
Angular8
GraphQL
- **Others**
Data Structures and Algorithms
